

BBC North West Tonight

The Clean Team were invited to appear on BBC north West News Tonight after a programme aired a report claiming that the North West was one of the worst areas for litter in the uk. Viewers were invited to send in pictures of litter to find the worst grot-spots. The Clean Team decided to show our Town in a positive light and so sent in a report about the Clean Team and its achievements. The High School were invited to attend the filming and members of the For The Future group were caught on camera.

The results of the programme have encouraged other towns to make enquiries. We have been contacted by Knutsford, Moulton & even by a lady from the Isle Of Man who is keen to start a Clean Team.
